

"Regs to Riches: The Engineer Dilemma"

The event titled **Regs to Riches: The Engineer Dilemma** was successfully organized with active participation from both faculty and students. A total of 10 faculty members and 55 students took part in this engaging and thought-provoking session.

The event aimed to shed light on the challenges and opportunities faced by engineering students as they transition from academic regulations ("regs") to achieving professional success ("riches"). Through a series of talks, panel discussions, and interactive activities, participants explored the dynamic journey of an engineer—from rigorous coursework and project deadlines to innovation, entrepreneurship, and career growth.

The keynote speakers Mr. Rose Kamal Love (CEO & Co Founder of Kroto), including experienced faculty members and Mr Yuvraj Singh & Mr. Yasir Parvez, shared valuable insights on how students can navigate the academic system while preparing for real-world challenges. Students actively participated in Q&A sessions, adding to the richness of the discussion with their perspectives and queries.

Navigating the Future: The Rise of Professionals

The event titled **Navigating the Future: The Rise of Professionals** was successfully conducted with the enthusiastic participation of faculty members and students. Held with the aim of guiding young minds toward a

dynamic professional future, the event provided a platform for insightful discussions, career guidance, and interactive sessions.

The program commenced with a welcome address by the organizing co-ordinator Dr. Anil Kumar Bisht, followed by keynote speeches from Mr Shantom Doda Senior Data Scientist at IKIGAI School of AI. They shared their experiences, industry insights, and emphasized the importance of adaptability, skill development, and lifelong learning in a rapidly evolving professional landscape.

Expert Talk on Career Guidance & Counselling

An **Expert Talk on Career Guidance & Counselling** was organized on 10-09-23 at CSIT Dept, with the objective of helping students explore various career opportunities and receive valuable insights from industry professionals. The event saw active participation from 10 faculty members and 60 students from various disciplines, making it an enriching and interactive session for all.

The session was conducted by Avneesh Verma (Senior Software Engineer Siemen Heal Thineer, Pune) a renowned career counsellor and motivational speaker, who emphasized the importance of early career planning and self-awareness. The talk covered key areas such as goal setting, skill development, industry trends, and decision-making strategies. The speaker also highlighted the significance of internships, networking, and continuous learning in today's competitive world.

Expert Talk on Current Trends in IT Industry

An insightful expert talk on ***Current Trends in the IT Industry*** was organized on 05-10-23 at CSIT Dept, drawing the participation of 8 faculty members and 65 enthusiastic students. The session aimed to bridge the gap between academic knowledge and industry demands, shedding light on the latest developments shaping the Information Technology landscape.

The event commenced with a warm welcome address by Dr. Anil Bisht, followed by the keynote delivered by Mr. Siddhartha Jaiswal (Assistant Consultant TCS, United Kingdom) with extensive experience in emerging technologies. The speaker highlighted significant trends such as Artificial Intelligence, Cloud Computing, Cybersecurity, Data Science, and the growing influence of Blockchain. Real-world applications and case studies were shared to provide students with practical insights.

Expert Talk on Power BI Visualization

An expert talk on **Power BI Visualization** was successfully conducted on 28-10-23 at CSIT Dept, attracting enthusiastic participation from both faculty and students. The event witnessed the active involvement of 10 faculty members and 87 students from FET/CSIT departments.

The session was aimed at introducing the participants to the fundamentals and advanced techniques of data visualization using Microsoft Power BI, a powerful business analytics tool. The expert speaker Mr. Adarsh Shukla (Business Analyst) provided deep insights into the real-time application of Power BI in industry settings. The talk covered key topics such as data modelling, creating interactive dashboards, and leveraging visuals to derive actionable insights from complex datasets.

Hands-on Workshop on Fundamentals of C Programming

A one-day hands-on workshop on the **Fundamentals of C Programming** was successfully conducted on 16-12-23 at Seminar Hall CSIT, aimed at strengthening the foundational knowledge of students in programming. The event saw enthusiastic participation from **60 students** and active involvement of **12 faculty members**, who served as mentors and resource persons throughout the session.

The workshop began with a brief inaugural session where the objectives and importance of learning C programming were highlighted. Following this, participants engaged in a series of interactive sessions covering core concepts such as data types, operators, control structures, functions, and arrays. Each topic was complemented with practical coding exercises, allowing students to gain real-time programming experience.

Workshop: "Data Exploring Career with Python"

A workshop titled "Data Exploring Career with Python" was successfully conducted on 26-06-24 at CSIT Dept, drawing enthusiastic participation from both students and faculty. The event was organized to introduce learners to the powerful capabilities of Python in the field of data science and to explore career opportunities related to it.

The workshop commenced with a welcome address by Prof Vinay Rishiwal, followed by hands-on training sessions led by Mr. Simranjeet Singh (Technical Manager).

Participants were introduced to Python basics, data handling libraries like Pandas and NumPy, and visualization tools such as Matplotlib and Seaborn. Real-world case studies were demonstrated to show how Python is used in data-driven decision making.

These findings are consistent with the idea that the brain is not a simple machine, but a complex system that can adapt and change in response to its environment. This suggests that the brain is not just a passive receiver of information, but an active participant in the process of learning and memory.
